Let Mexican fiesta set scene for your next party

To celebrate a winter vaca-tion in Mexico, we recently gave a dinner party for our Ar-lington Heighs: traveling companions, Bill and Dorothy Duffy, and four other couples. The Duffys and we exhibited our pictures and recounted our more memorable "adven-turist." One thing we learned about Mexico is that no matter below well deboned four holds.

The menu included chili, which is accusing a Texan rather than a Mexican dish, but is served in northern Mexico; a Spanish corn casserole' that is the dead of very thing, but the included of very thing but the green pepers, tomalocs, olives, raisint and boiled egg-but turned out deficieus, and chilled cauliflower with guacamole suace instead of a guacamole vasce instead of a guacamole vasce instead of a proposal superior per personal control of the person of t

Everyone enjoyed sangria, a wine punch made with dry, red wine, fruit slices, lemon juice, sugar and crushed ice. Dessert was served on a silver tray loaded with slices of apples and pears; crackers, and three kinds of soft cheese — bel puece, camembert and brie.

THE TABLES and buffer were covered with hot pink cloths. For candle holders I had used a nail to punch holes in large-sized tin cans. These cans were set on top of other cans and then surrounded with about 50 creep paper flowers that I had me. An oringe-and gold. White dishes, red golders and orange napkins

completed the table settings.

As J. dan't have any orange napkins, I used disposable guest towels instead. They are larger and more convenient to use than paper napkins.

The color scheme was bright and gay and certainly Mexican. I think it helped to set the mood for the party.

April 15 is coming up busy
indeed. First of all it is the final
day to try to wrangle a few
bucks back from Uncle Sam
and there's not much time for
figuring high finances. Then on April 15, the League of Women Voters will start circulating their petition to get one million signatures asking the federal government to allow the District of Columbia to elect a representative to Congress. They refer to D. C. as "the last colony."

THERE WILL also be an

Io to Hymen, Io, Io, sing, Of wedlock, love, and youth is Hymen king.

Thomas Dekker (1570 - 1632)

A wedding in the offing means many things to many people. Long-time dreams and plans are about to become a reality and in actuality the happy wedding day is really just the beginning of dreams and plans.

Today's bride, though certainly modern, tends to forgo the fads when she selects her wedding gowns. And the gowns of her attendants too will carry through in a romantic moonlight-and-roses theme.

Our bridal guide this spring has been designed especially for you, the bride-to-be, and for those who will be sharing in your weeks of. preparation. With careful planning every detail of your wedding can become a cherished memory and a stepping-stone to a new beginning.

Bread comes two ways:

Thick, white and soft. Lean, tan and healthy.

We all know about the soft stuff. Here's about the other. Wasa Ry-King. The Swedish crispbread. It doesn't look or taste like

the other kind of bread. It's

crisp, doesn't tear or crumble when you butter it.

And talk about health.
No chemical preservatives are added here.

Ry-King is made with the whole rye grait, from the nutritious germ, to the husky bran. So it has natural prote vitamins and minerals nat found in saft white bread.

It tastes right with just about everything. For breakfast, lunch, dinner or snacks. If you've got the idea, we have the bread. The other bread.

THE OLDEST HOUSE SAINT AUGUSTINE, FLORIDA

Archaeological research to date shows continuous occupancy of the Oldest House site from the early 1600's to the present day. This house rose from the ashes of a crude early structure to polm thatch and wood, perhaps destroyed in 1702. The house as you now view it is an evolution from its early form, and the fabric of the house tells the story of a long and colorful past.

Many additions have been made to the Oldest House during its long history. The result is a composite of several different periods, rather than the product of any single one. The first floor walls are solidly constructed of coquina, a natural shell-stone found on Anastasia Island.

across the bay. Its tapia (tabby) floors, a mixture of lime, sand and shell, are typically Spanish, and also go back to a very early period. Few, if any, of our early Spanish houses had fireplaces. The Spanish used charcoal braziers. Fireplaces came with the British in 1763. The Spanish covered their windows with projecting lattices of wood, and used wooden shutters to keep out their enemies and the weather.

Secluded patios were located to the rear of the houses, and were well stocked with orange, lemon, pomegranate, fig and other fruit trees suited to the climate.
